# MISSION

The Cold Spring School Foundation is a voluntary, non-profit, fund raising organization authorized by the Cold Spring School Board to support curriculum enrichment and other unique educational needs of the children of the Cold Spring School District. The Foundation and the Parent Club, an autonomous division of the Foundation, are committed to helping the administration, faculty, parents, and staff provide Cold Spring District students with the highest quality programs available.

# Letter from the Superintendent-Principal

Dear Parents and Community Members,

Cold Spring School continues to be ranked as a top school in the State of California and for its Academic Excellence in Education! Our dedicated teachers and staff, parents, and community work together to provide an outstanding learning environment for each individual student.

Cold Spring School has created a learning environment that encourages self-discovery with multiple hands-on learning opportunities. The committed teachers and staff are constantly striving to identify and support each child's passion by offering a comprehensive core program that incorporates Art, Physical Education, Music and Theatre, Technology, and Design/Engineering.

Together, we are working to ensure every student leaves sixth grade with a desire to "make a difference" by following their passion. We empower every student by encouraging him or her to think differently about the world we live in through these comprehensive enrichment programs.

These enrichment programs would not be available without the financial support and involvement of the parents and the community as all of these enrichment programs are supported by parent and community contributions made through the Cold Spring School Foundation.

I am thankful to be leading a community that believes we can make the world a better place by supporting the creativity and innovation inside each one of our children. Thank you for your continued support!

Amy Alzina, Ed.D

Superintendent-Principal,  
Cold Spring School

## Letter from the Presidents

We are honored to be Co-Presidents of the Cold Spring School Foundation for the 2018-2019 School year. As a parent at Cold Spring, you are an integral part of the success of our children and the programs that the Foundation supports.

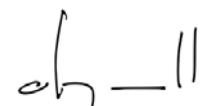

We joined the CSS Foundation because we learned that the Specialist Programs were not entirely covered by the district budget and that it took a special fundraising effort to support our instructors in technology, arts, music/band, STEAM (applied science), library, and physical education, and the essential tools such as computers, programs, art supplies, books, and sports equipment they need. How much does this cost?

**Approximately \$600,000/year or over \$3,500 per student per year!**

It's you, parents in the community – both current and alumni – corporate donors, and friends of Cold Spring School that allow us to help fund these programs. Last year, the Foundation donated money for pottery wheels, band instruments, a 3D printer, laptops and many more items for the Specialists Programs. This year, the Foundation has already given money to support new laptops for the school. We are committed to ensuring our programs are well equipped for the future of our children.

On October 8, we kicked off the Fall Campaign and you all have already shown your generosity and support. The goal is raise \$175,000 to support our Specialist Programs and to ensure that we can help support the school in a big way. We are looking to parents, grandparents, alumni and local businesses to help support our programs. It is the generous contributions from our community that help make these programs possible each and every year.

Please help the Foundation support the amazing Programs that our school provides for our children. Reach out to other members in the community and help us raise money to support the growth and development of our wonderful children.

Clay Aurell

Co-President,  
Cold Spring School Foundation

Karmen Aurell

Co-President,  
Cold Spring School Foundation

Supplemental Specialist Programs are critical to the well-rounded student and differentiate Cold Spring School from the typical public school.

Students at Cold Spring Elementary School benefit from six specialist programs not regularly offered in California public elementary schools. Students learn the fundamentals of music, art, technology, STEAM, and physical education, and have the opportunity to foster a love of reading while learning about different books in the library.

The arts in education have been cut from many schools across the country, depriving so many children of their benefits. "The intrinsic pleasures and stimulation of the art experience do more than sweeten an individual's life – they can connect people more deeply to the world and open them to new ways of seeing, creating the foundation to forge social bonds and community cohesion"

-Rand Corporation Study & Report, 2005

# ART

As with music, art has been perceived a luxury and cut from many schools for funding reasons. However, like the other specialist programs at Cold Spring School, art is central in the shaping of the well-rounded student. It promotes creativity, critical thinking, and offers opportunities for integration with other subjects to engage students in a way they might not otherwise be interested in. Art promotes a connectivity to culture that spans time and nationalities. Not the least benefit of art is the fact that nearly all students find it enjoyable at some level, forging an attraction for learning and an interest in school that might not naturally exist in other subject areas.

Cold Spring School lays claim to an unparalleled art program led by talented artist, Amber O'Neill. Her impressive CV includes the study of art history in Florence and a BA from UCSB in Fine Art. Her talent has afforded her the ability to show her own work in various galleries but she has realized that her greatest passion is teaching art to children. She takes joy in their curiosity, creativity, and desire to learn.

At Cold Spring School, the teachers collaborate to create units of study that incorporate fine art into the development of

motor skills, cognitive development, math concepts, and language art skills.

Ms. O'Neill helps students understand how art fits into every aspect of learning and how it plays a part in world cultures, history, and their future careers. Most importantly, she has framed a program that utilizes art to build confidence through self-directed problem solving and allows students to express their unique ideas in a fun and encouraging setting.

The supportive and enriching environment at Cold Spring School has allowed Ms. O'Neill to teach techniques and media that most students do not experience until high school or college. The budding artists at Cold Spring create functional ceramic pottery, pull prints off of a press, paint landscapes in the style of the Impressionists, carve sculptures like the Romans, and experience their own street painting festival. The students enjoy field trips to museums and galleries, visits from resident artists, and a school wide art exhibit that showcases their achievements. Ms. O'Neill works annually to sustain these traditions and looks forward to incorporating new ones such as mural painting, screen printing, and design.

# MUSIC

---

Cold Spring School students have the privilege of a fine music program. Music education not only contributes to the creation of a well-rounded student, it keeps students engaged in school, boosts academic performance, and serves as an outlet for creative expression.

The music program at Cold Spring School is led by the highly credentialed Sara DiSalvo. After studying music at Wheaton College Conservatory, she won awards as a piano concerto soloist with the Santa Barbara symphony, sang operatic roles with Westmont College, danced professionally around the world, and owned her own piano, voice, and guitar studio for eight years. Her passion for music and teaching comes through clearly in her interaction with her students. She loves the creativity and emotional development involved with stewarding young lives through music appreciation.

Every year, Cold Spring School families are treated to multiple musicals and entertaining sings in demonstration of what the kids are learning. Ms. Di Salvo strives to give each learner the opportunity to be engaged in some aspect of music and the confidence to sing and perform. She works diligently to ensure each graduate of Cold Spring is able to value music and that music always occupies some aspect of their lives whether they're playing, singing, or appreciating it.

Through Ms. Di Salvo's leadership, Cold Spring School students transfer their learned skills in performing arts later in their lives to experiences with public speaking, interviewing, teamwork, overcoming performance anxiety, and simply smiling.

# PHYSICAL EDUCATION

A quality physical education program provides students with the direct benefits of physical activity such as improved motor skills, muscular strength, flexibility, and endurance. The benefits of regular physical activity, however, extend beyond the playing field to a student's mental health. It positively impacts self-esteem, relieves stress, and helps with focus, self-discipline, and the goal setting process needed to do well in the classroom. An exceptional program will additionally coach students in social and character related areas, allowing them the opportunity to cooperate with others, assume leadership roles, and accept responsibility for their own behavior.

The students at Cold Spring School are fortunate to be lead in this critical endeavor by Christian Garfield. Mr. Garfield has been teaching at CSS for over 18 years in many different capacities. Recently, he has added PE teacher to his long list of accolades. Although he has been serving as both the Director of Technology and technology teacher during his years at Cold Spring School, he is extremely excited to be the new PE teacher and continue his contribution to the specialist programs at the school.

Mr. Garfield has had the privilege of coaching almost every modern day sport including basketball, baseball, soccer, and surfing for kids throughout the community. This experience helps him understand and appreciate a variety of sports and games while at the same time remembering that they are just games and that they should and can be enjoyed. It is through the development of this enjoyment that students reap a lifetime of the benefits of physical activity. It is Christian's goal that through his teaching all students feel loved and that they matter.

In addition to coaching many sports, Mr. Garfield worked with the City Parks and Recreation Department while in high school and College. He has always enjoyed coaching and working with students of all ages and is very excited to lead the PE classes at our school. Not merely an exercise or sports program, the physical education program at Cold Spring School fosters sportsmanship and camaraderie in the loving and caring community that is Cold Spring School.

# LIBRARY

The library is a welcoming environment in which children are able to foster a love of reading, an appreciation for a variety of types of books, and in which they can learn the principles of finding and retrieving relevant information. The Cold Spring School library program encourages diverse literary exploration and supports the development of strong readers, writers, and communicators by focusing on a variety of genres. Participation in the library program puts reliable sources of information at students' fingertips and instills good research habits by integrating seamlessly with classroom initiatives. The library encourages a love of reading while training students to effectively discover and use information.

# TECHNOLOGY

It is doubtful anyone would question the importance of technology in the modern world. As such, for students to survive and thrive, they must have a firm grasp on technology from an early age. Technology education is not only essential because students and parents demand it, but because there is hardly a career in existence that doesn't use it in some way shape or form.

The incorporation and ongoing management of a viable technology program is a sizeable and expensive, but necessary task. Teaching kids technology basics, and in particular coding and computer science fundamentals, teaches logic, cause and effect, problem solving, and project design including the ability to break down more complex tasks into manageable parts.

Cold Spring students are learning the latest in technology from Christian Garfield. Mr. Garfield has been a primary school educator for the past 17 years, 14 of which have been spent at Cold Spring. He incorporates the technology standards within the CCSS in a hands-on, collaborative environment through project-based learning to ensure all students are able to transfer their knowledge to real world applications. The curriculum is supported by the classroom teacher and STEAM teacher to create a personalized, integrated approach to student learning. Students are encouraged to be creative and innovative in projects relative to their world. As a result, students practice and master standards related to technology, engineering, and mathematics.

Instruction begins with the dexterity and coordination to use a mouse or touchscreen to navigate within applications. Subsequently, keyboarding, word processing, photo editing, and collage making are introduced in the early grades. Third and fourth graders are introduced to research and presentation strategies including spreadsheet use for plotting and graphing. In the upper grades, students tackle more complex skills. They learn how to use creative and precise software such as Adobe Illustrator to produce a digital file that can be 3D printed. They utilize recording, editing, and desktop publishing tools to create movies and brochures. By the end of sixth grade, students will have designed, created, and edited their own short films.

Mr. Garfield takes great joy in teaching all grade levels and in getting to know and guide students over the duration of their seven years at Cold Spring School. It is his aim to ensure all graduates emerge as prepared, confident, and technologically adroit learners, well equipped to thrive in the digital age.

# STEAM

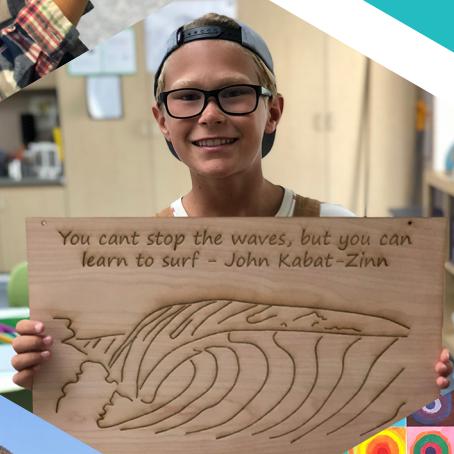

STEAM as an integral part of education has taken root in recent years. It is an interdisciplinary approach to learning that incorporates Science, Technology, Engineering, the Arts, and Mathematics. The heart of STEAM is an engaging approach that encourages inquiry, dialogue, and critical thinking about real-world issues. It not only forges a deeper understanding of the application of traditional elementary subject matter such as science and mathematics, it leads students to ask questions, formulate creative answers and solutions, and connect the dots in a way not readily apparent in the isolated study of an individual subject matter.

While STEAM is relatively new at Cold Spring School, it is rapidly picking up momentum. In its inaugural year, led by Dr. Jean Gradias, students installed a native garden at school. The students themselves were responsible for noticing a problem, designing a solution and presenting their work to adults in the school community and beyond. The end result showed the students that their effort and imagination made a positive difference on campus.

Upcoming activities in STEAM at Cold Spring include reinstating a collegiate partnership to bring biology and chemistry majors into the classrooms as science mentors. Dr. Gradias is looking to transform the STEAM classroom into a design lab, utilizing technology to enable students to prototype engineering solutions to issues relevant to them. Development of a robotics program is also a priority which will utilize project-based learning to solve real-world problems with technology.

The students are fortunate to be led in the STEAM program by Dr. Gradias, who has a master's degree in education from UCSB and who recently completed her doctorate in Educational Leadership and Change. She works diligently to ensure that her teaching is flexible and responsive, placing a priority on preparing students to be able to contribute to and improve the world they are entering through independent thought and ingenuity.

Over \$30,000 of YOUR funds were released to pay for the following requests from our Specialist Programs.

### STEAM \$8,000

- Consumables and materials
- 3D printer and film

### TECHNOLOGY \$12,660

- Computers: 50% of 20 Macbook Airs in support of the 3rd grade Lease to Own laptop program
- Video cameras: 3 digital video cameras for student digital stories, short movies and film projects

### ART \$4,697

- Set of table top easels
- Set of new smocks
- 6 throwing wheels for ceramics
- High quality canvases and frames for student art
- Blank canvas banners for events

### MUSIC \$5,950

- School instruments: 2 of each instrument so that students have an option to borrow a saxophone, clarinet or trumpet
- New mixer board for auditorium
- Costumes for Spring Sing motown theme

# Designated Fundraising

This year, as in past years, the Foundation has conducted an “ask” at the annual Spring Event fundraiser. The “ask” is a paddle raise geared at bringing in funds for a specific item. Thanks to our generous audience, \$39,200 was raised to fully fund two classroom instructional aides for one school year.

## Impact of Thomas Fire and Debris Flow

Due to the tragedy of the Thomas Fire and Debris Flow our school was faced with many unforeseen and difficult circumstances to navigate including a major budget shortfall. The Foundation worked with the administration to find a tangible way that we could support the school, the teachers, and the students in areas that would have been directly impacted by budget restrictions.

## Classroom Instructional Aide **\$39,200**

Today, we are happy to report that every single teacher at Cold Spring School continues to have a classroom instructional aide. When teachers and students have this invaluable classroom support it allows for focused small group interaction and application of concepts. It also means more individual attention for students when needed. It is quite normal to walk into a classroom on campus and see an aide working with a small group of students.

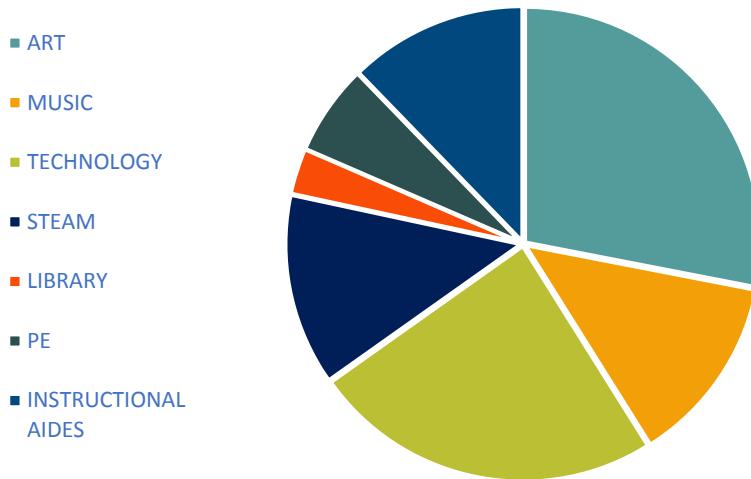

Our classroom aides are an integral part of the school and the top-quality education our students are receiving. We are very grateful to the community for their support in funding this ask so generously.

“Tell me and I forget, teach me and I may remember, involve me and I learn.” – Benjamin Franklin

# 2018 Grant Disbursement

2018 Grant Payment by Program

Your Contributions Make a Difference

The donations received this year by the Foundation provided funds essential to the support of Art, Music, PE, Technology, STEAM, and Library.

Total Costs and Foundation Support

<i>Specialist Program Costs</i>	<i>FY 2019</i>	<i>FY 2018</i>
ART	94,092	92,092
MUSIC	150,511	143,627

 <b>TOTAL FOUNDATION SUPPORT</b>	 <b>320,000</b>	 <b>165,050</b>

46% of Specialist Program Funding came from Foundation

# Cold Spring School Students spend nearly 300 hours per year in specialist programs

In addition to fully funding two instructional classroom aides, this year's generous donors raised the funds to provide each student an average of 134 hours of specialist program instruction or:

151 HOURS OF

ART

OR 229 HOURS OF

LIBRARY

OR 66 HOURS OF

STEAM

OR 151 HOURS OF

TECH

OR 211 HOURS OF

PE

OR 121 HOURS OF

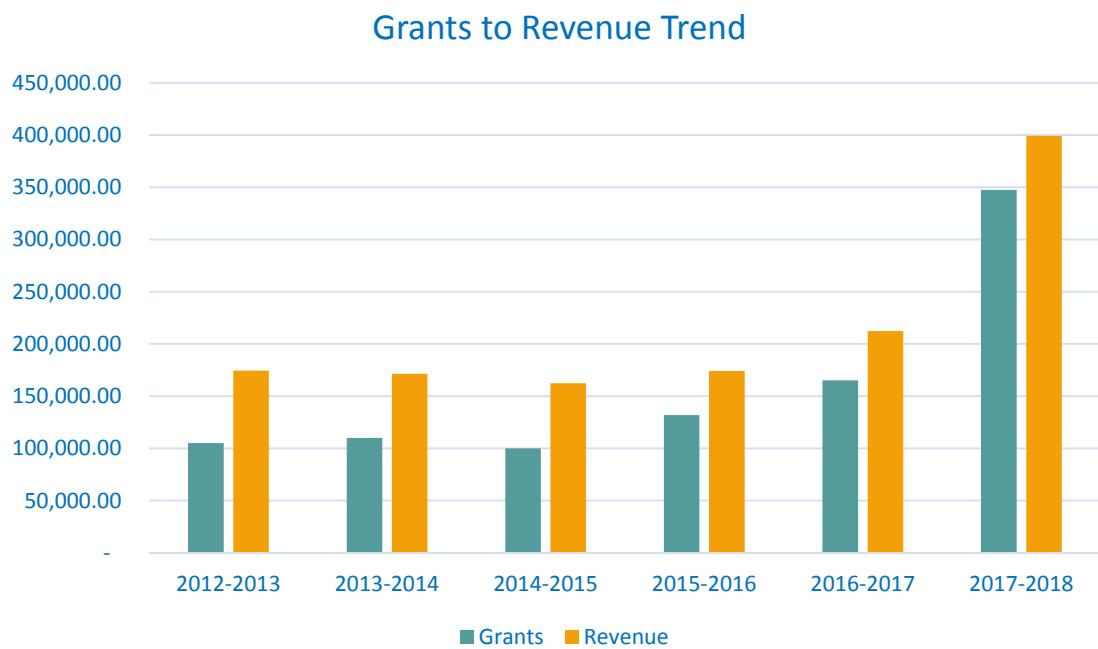

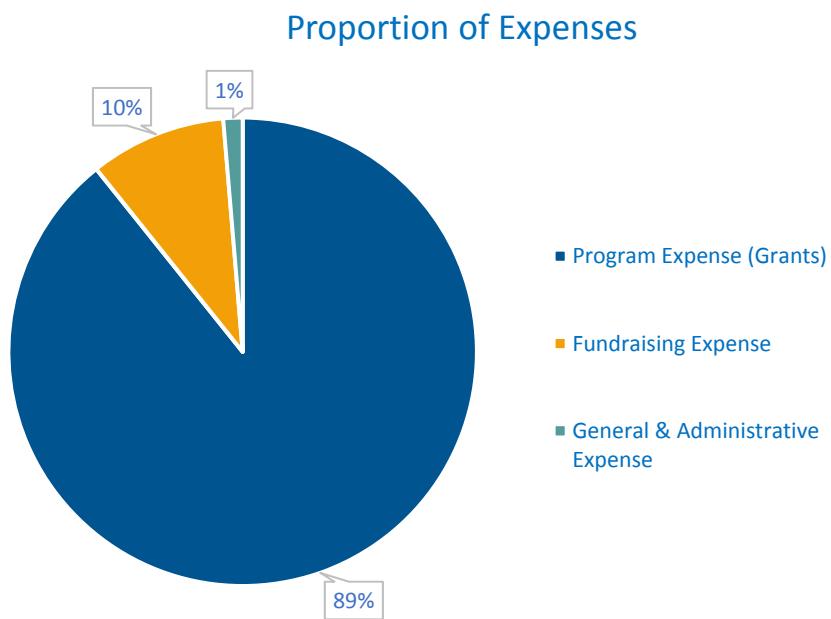

MUSIC

Restricted Fund Grants in past years have paid for:

- Teacher Training
- Parent Education
- Field Trips
- Auditorium AV
- Landscaping
- iPads
- Playground Equipment
